

WRS EMR Tabbed Browser Settings

In order to make charting even more efficient, tabbed browser functionality is available through the EMR Module. This allows the user to automatically launch parts of an EMR note into a separate browser tabs or windows within Google Chrome. This eliminated the need to relaunch and reload particular parts of the note during an encounter

Google Chrome Settings

- Select **Settings>You and Google>Scroll to 'on Startup' Section**
 - Select (check off): "Open the New Tab Page"

On startup

- ☒ Open the New Tab page
- ☐ Continue where you left off
- ☐ Open a specific page or set of pages

WRS Settings

- In WRS under **My Preferences>EMR Preferences**, select "open in new tab" and save

☒ * Unchecking this box will default all patient notes to NOT BE SENT to the patient portal. This is a MU Core Measure, and unchecking could result in non-compliance with MU

✓ Save

Additional Information

Note that the system will automatically open Medication, Orders/Procedures, and Assessment/Plan in a new window/tab. All Other Parts of a note can be opened in a new tab/window, as follows:

- Mouse over the section of the note to be launched and **Right Click**
- Select **Open in NEW Tab/Window**

Test, Christina
20 year old female,
DOB: Jan 1, 2000

 **CLINICAL DATE**
MAR 4, 2020 TO MAR 4, 2020
