Re: Updates to the WRS Health System

WRS Health is proud to announce the release of enhanced features in response to the continued feedback, needs and requests of our user community.

SNOMED & LOINC Coding

CMS recently mandated that some Quality Measures use specific codes for identification and reporting. The common codes remain (i.e. CPT, ICD, Rx Norm), but some measures are now requiring the use of SNOMED and LOINC codes. As such, functionality the allows users to easily add these codes in their charting workflow.

Why It's Important?

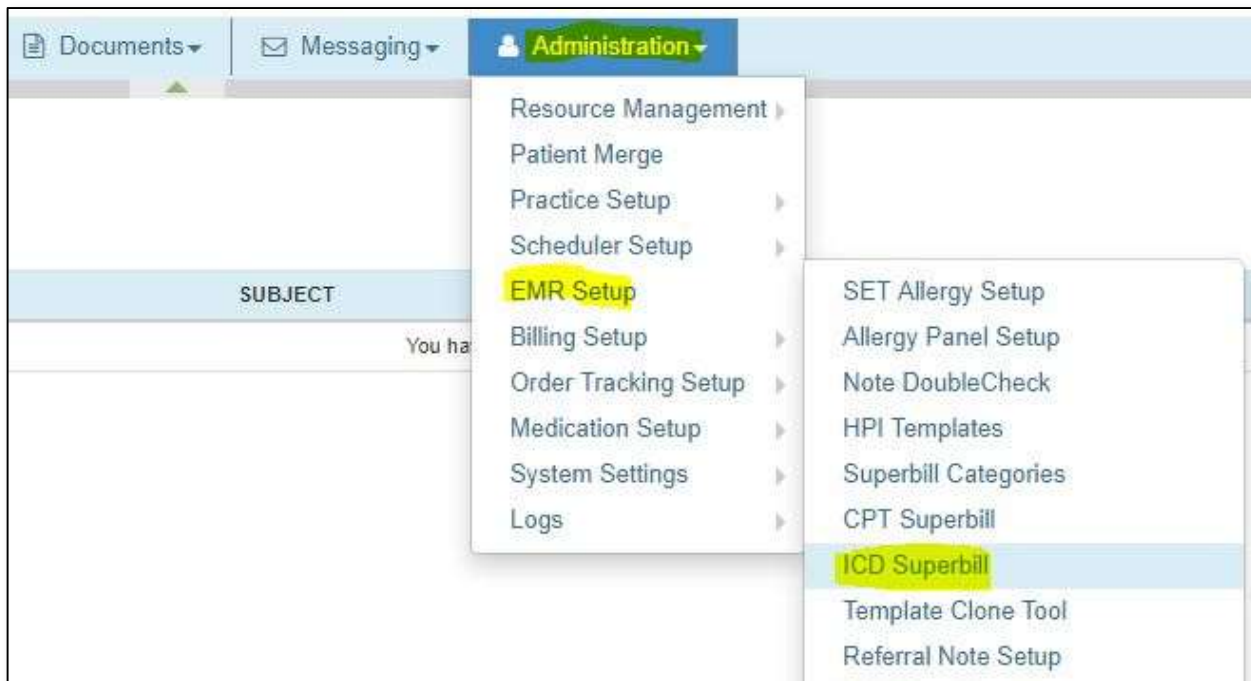

SNOMED codes are used to identify items such as clinical findings, symptoms, diagnoses, procedures, body structures, organisms and other items. LOINC codes are used to indicate measurements, observations and documents. Failing to add required SNOMED or LOINC codes to your notes will result in Quality Measures not being captured for reporting purposes. This could have a negative impact on your MIPS performance reports.

Setup

SNOMED Codes - To setup and configure SNOMED codes just navigate to **Administration>EMR**

Setup>ICD Superbill:

On the **ICD Superbill Management Page** select the checkbox for **DISPLAY SNOMED IN SUPERBILL:**

SNOMED codes are added just like ICD codes are in the **Superbill Item Details** area. Be sure you to select **SNOMED** from the **Code Type** dropdown, then enter an Item Name (or partial name) into the **Item Name Box** o search for the SNOMED numerical code. Select the code from the list to add it. Note that you can modify the name of the code so that it appears with your own description:

ICD Superbill Management

Superbill Item Details

CATEGORY* SNOMED CODES (for MIPS)

CODE TYPE SNOMED

ITEM NAME* 18351500

[183515008] Referral to physician
 [183515008] Referral to physician (procedure)

Referral to physician

ICD CODE

Save Cancel

On the **Assessment page**, select the **SNOMED** option from the dropdown. This will make the added SNOMED codes selected under ICD setup viewable on the page. The codes can then be selected from the checkbox in order to add them to a note. You can also manually search for SNOMED codes by simply typing in the SNOMED numerical code if you know it.

+ Add to Current Note Assessments Customize Practice Most Frequent Diagnoses

ADD PROBLEM

LOINC CODE MODULE

To setup and configure SNOMED coding for selection within the note, navigate to Administration>EMR SETUP>LOINC PICKLIST:

The screenshot shows the 'Administration' menu expanded. The 'EMR Setup' option is highlighted in green. Below it, the 'LOINC Picklist' option is highlighted in orange at the bottom of the sub-menu.

Diagnoses:
 H93.19 Tinnitus, unspecified ear
 E04.1 Nontoxic single thyroid nodule
 J32.0 Chronic maxillary sinusitis

Medical Decision-making:
 Visit is primarily counseling/coordination. Time spent with patient: 120 minutes.

LOINC Codes:
 19762-4 - PAP Smear

Fax number:

WRS has also implemented the ability to associate any ICD and/or CPT code in your Superbill with a SNOMED and/or LOIN-C code, using the same setup as associating ICD to CPT codes.

From either the EMR Setup>CPT Superbill or ICD Superbill, you can add additional coding to the CPT or ICD.

Select the appropriate code from your SuperBill and search/add the associated LOIN-C and/or SNOMED code (these CMS required codes may be found within the pdf workflow guides associated with each Quality measure):

Superbill Item Details

CATEGORY* E&M Coding
